The BAE/BSE program has 11 SLOs with a three-year assessment rotation (i.e., each SLO is assessed every three years). For the 2008-2009 academic year, SLOs 5 through 8 were assessed through performance of all BAE/BSE students in specific activities in required courses (i.e., BAE 231, 331, 536, and 640). Direct measures, including performance of BAE/BSE students in specific course activities (e.g., design projects) suggest that, in general, all BAE/BSE students were able to achieve SLOs 5 through 8. As such, no corrective actions are being implemented. To provide a more effective and consistent assessment process, the BAE teaching faculty has identified two to four performance criteria for each outcome, and are currently developing specific assessment tools or measures for each performance criterion.
