END OF H1N1 INFLUENZA PANDEMIC:
The World Health Organization International Health Regulations Emergency Committee has declared an end to the 2009 H1N1 influenza pandemic. The committee based their declaration on indications that influenza (worldwide) is transitioning toward seasonal patterns of transmission. It is anticipated that the pandemic virus will behave as a seasonal influenza A virus. Everyone is encouraged to get the seasonal flu vaccination when it becomes available. This vaccination will include immunity to H1N1. Same applies this year as last year…if you are ill and have an elevated fever, stay home!
